Appl. No. 10/773,955

Amdt. dated December 4, 2007

Reply to Office action of September 10, 2007

Amendments to the Claims:

The listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (currently amended): An automatic multimedia recording and reproduction system A-
system for application in an automatic vending machine for self-service recording and
reproduction of sound and moving images on the spot in any format of recording discs, taking
passport photo shots as well as printing photos of images from pre-recorded memory cards
comprising:

a controlling and processing system;

a payment handling system;

a data storage system;

a sound and image recording system;

a reproduction and output system;

a power supply system;

~~and a system for supplying specific recording discs for use,~~

wherein the payment handling system, the data storage system, the sound and image recording
system, the reproduction and output system and the power supply system are each connected
to the controlling and processing system and the payment handling system, the sound and
image recording system and the reproduction and output system are each connected to the
power supply system; the controlling and processing system, the payment handling system, the
data storage system, the sound and image recording system, the reproduction and output
system and the power supply system are structured as an automatic vending machine in a
booth shape, and a video camera being part of the sound and image recording system and
speakers being part of the controlling and processing system are disposed in the exposed areas
on the booth shape for recording sound and moving images; and a [[the]] system for supplying
specific recording discs is structured as a separate [[an]] automatic vending machine isolated
from the automatic vending machine incorporating the controlling and processing system, the
payment handling system, the data storage system, the sound and image recording system, the
reproduction and output system and the power supply system.
